Cauda Equina Syndrome UK is hosting its first conference to raise awareness of CES. This important conference focuses on understanding CES from the medical, legal and patient perspective. CES is a serious neurological condition which occurs when the nerves at the base of the Spinal cord become compressed. It is a debilitating condition which can affect anyone, and being aware of the ‘Red Flag Symptoms’ of CES can help prevent late or missed diagnosis of the condition. As well as raising awareness, our charity aims to use your donations to improve the standard of care following diagnosis of CES and help sufferers of CES cope with their condition by providing advice and support.

Monday 10th February 2014
